Personal Information

Determination, discipline, inventiveness, and practicality have always been key traits of mine. I am constantly looking for new challenges and opportunities for professional and personal growth, and I easily adapt to new environments and work situations.

Areas of interest:

In the future, I would like to develop my skills and work in fields like backend development, pentesting, low-level programming, fintech, bioinformatics and artificial intelligence, but I am always open to exploring new opportunities that align with my interests.

Post-graduation expectations:

I would like to be able to combine study and work, finding a position in my field of interest while pursuing a master's degree.

Andrea Perozzo

Computer Science student at the University of Padua

Expected internship start: March/April 2025

Education

08/2022 - ONGOING | UNIVERSITY OF PADUA

Computer Science

Biomedical Engineering

09/2014 - 06/2019 | BERNARDI (PADUA)

Electrical Systems

Professional experience

07/2020 - 09/2021 | MEGIUS SPA

Production Scheduler / Purchasing

Megius Spa is a manufacturer of glass and crystal shower enclosures and boxes, saunas, and hammams.

Main responsibilities:

- Planning and managing production orders, including determining requirements (MRP) and assigning tasks to production lines.
- Managing the loading and unloading movements of goods in the warehouse, including the creation and registration of delivery notes (DDT).
- Coordinating requests from the sales department to ensure adherence to delivery schedules.
- Managing supplier orders and contract work, ensuring the procurement of raw materials.
- Resolving discrepancies between warehouse inventories and physical mapping by implementing corrective solutions.
- Ongoing negotiation with suppliers to obtain competitive purchasing conditions.

08/2019 - 07/2020 | NEXTSIGHT SRL

Production Technician

Next Sight produces fully automated non-mydriatic fundus cameras that are supported by a telemedicine platform.

Main responsibilities:

- Weekly production scheduling based on sales forecasts, optimizing resources and timelines.
- Production, programming, and calibration of medical devices.
- Active involvement in the transfer of production, including drafting troubleshooting manuals and conducting training courses for the team.
- Managing post-sale technical support activities, assisting customers, and resolving any technical issues.
- Supervising quality control, ensuring that products meet compliance and performance standards.

02/2018 - 04/2018 | ELETTOQUATTRO SRL

Electrician (stage)

Installation of gates (motors, photocells, guides, etc.), alarm systems, PLC programming, outdoor lighting, testing and commissioning of various systems.

07/2017 - 08/2017 | SANVIDO PAOLO

Electrician (stage)

Installation of gates (motors, photocells, guides, etc.), outdoor lighting, testing and commissioning of various systems.
