About Me

Driven by an insatiable curiosity and a competitive mindset, I am constantly seeking new knowledge and challenges across technical and scientific domains. I thrive in environments that push me to learn, adapt, and improve. I believe deeply in the value of social relationships, constructive debate, and continuous personal growth. Outside of work, I stay active through swimming and fitness, enjoy chess as a mental challenge, and apply an analytical mindset to geopolitics. I am deeply fascinated by the sciences, particularly medicine and chemistry, and I feed a broad curiosity through reading manga, traveling, and actively managing my personal finances and investment portfolio with a strong passion for markets and long-term wealth building.

Education

University of Padua	Sept 2025 - (Ongoing)
Master's degree in Computer Science	
University of Padua	Sept 2022 - Sept 2025
Bachelor's degree in Computer Science - Grade: 98/110	
University of Padua	Sept 2021 - Aug 2022 (Interrupted)
Bachelor's degree in Biomedical Engineering (Incomplete)	
IPSIA E. Bernardi (Padua)	Sept 2014 - June 2019
Diploma in Industrial Electrical Systems	

Work Experience

Software Developer - Wavelop Srl (Treviso - Remote)	Jan 2026 - Present (Part-time)
Full-stack development of high-performance web platforms.	
- Engineered responsive, type-safe user interfaces using Next.js, React, Astro, and TypeScript to enhance user experience and maintainability. - Architected scalable backend solutions using Strapi CMS, ensuring modularity and efficient content management. - Integrated robust data validation and schema definitions using Zod and implemented comprehensive testing strategies to ensure software reliability.	
Network Security Engineer Intern - Kirey Srl (Padova - Hybrid)	May 2025 - July 2025 (Full-time)
Specialized in web application security and advanced traffic analysis.	
- Optimized and tuned F5 BIG-IP WAF policies to proactively mitigate OWASP Top 10 vulnerabilities and secure application endpoints. - Conducted deep traffic analysis and behavioral detection using Burp Suite and simulated attack environments. - Performed penetration testing on internal web applications to identify exploitable vulnerabilities, then iteratively repeated attacks to validate mitigation coverage.	

Production Scheduler - Megius Spa (Mestrino - Onsite) July 2020 - Sept 2021 (Full-time)

Coordinated production planning and streamlined warehouse operations.

- Optimized supplier relationships and material availability through the strategic use of MRP systems.
- Managed complex logistics documentation and implemented corrective actions to resolve inventory discrepancies.

Production Technician - NextSight Srl (Limena - Onsite) July 2019 - July 2020 (Full-time)

Managed the end-to-end assembly, calibration, and quality assurance of automated fundus cameras, supporting the transfer of production to a French multinational.

- Led hardware assembly and calibration of optical medical devices from prototype to final QA, ensuring compliance with quality standards.
- Authored troubleshooting and assembly manuals to facilitate the production transfer to the French parent company, ensuring a handover of manufacturing processes.
- Managed service operations, including diagnosis, repair, and return-to-market of recalled devices from international customers.
- Delivered hands-on technical training to French production teams on assembly protocols, calibration procedures, and quality control workflows.

Electrician - Elettroquattro Srl (Veggiano - Onsite) Jan 2018 - Mar 2018 (Full-time)

Worked as an industrial electrician, gaining hands-on experience in electrical installations and maintenance.

- Installed, wired, and maintained industrial electrical systems and control panels according to electrical schematics.
- Performed electrical measurements and fault diagnosis on industrial machinery and electropneumatic systems.
- Assisted in assembling switchboards and wiring electrical circuits under supervision.

Projects

CarSensor

github.com/Perruzz/CarSensor

Software application for vehicle sensor data visualization and management, engineered in C++ using the Qt framework for high-performance data processing.

LuzzattiHospital

github.com/Perruzz/LuzzattiHospital

Robust relational database system designed for comprehensive hospital management, featuring advanced schema modeling, complex query optimization, and strict data integrity constraints.

Thesis

github.com/Perruzz/thesis

Bachelor's degree thesis developed in collaboration with Kirey Srl, focusing on advanced cybersecurity research and network protection strategies.

DoFlamingo

github.com/Giuseppe5000/DoFlamingo

Decentralized web application for the purchase and trade of NFTs, leveraging the Ethereum blockchain.

NearYou

github.com/SWEatUNIPD/NearYou

Collaborative web application for local point-of-interest discovery, developed using Agile methodologies to ensure iterative delivery and user-centric design.

Portfolio

perruzz.github.io/Perruzz/

Personal portfolio website built with Flutter and Dart, showcasing projects and professional experience with a cross-platform design.

Skills

- **Backend & Web:** Strapi, Next, React, Astro, HTML, CSS, JavaScript, TypeScript, PHP, SQL, phpMyAdmin, PostgreSQL, MongoDB, AWS, Docker, Flutter, Dart.
- **Security & Infrastructure:** OWASP, F5 BIG-IP, Burp Suite, TCP/IP, HTTP, VPN, Cryptography, Firewall, VMware Workstation.
- **Operating Systems:** Linux (Debian, Fedora, Arch based), Windows, macOS.
- **Scripting:** Bash scripting, Shell automation.
- **Programming & Frameworks:** C, C++, Qt, Python, Java, Apache Spark.
- **Software Engineering:** Design Patterns, System Architecture, SOLID principles.
- **Tools & Version Control:** Git, GitHub, GitLab.
- **Documentation:** LaTeX, Typst.
- **Industrial Electrical & Automation:** PLC Programming, Electropneumatics, Electrical Schematic Design & Reading, Industrial Control Panels, Electrical Measurements and Instrumentation.
- **Chemistry:** Organic, Inorganic, and Biochemistry.
- **Industrial Manufacturing & Hardware:** Hardware Assembly & Calibration, Diagnostic Troubleshooting, Field Service, Technical Manual, Technical Training, Production Line Setup & Transfer Support.
- **Languages:** Italian (Native), English (B2).
